To donate your time contact
Focus on Home to volunteer.

Room in a Box donation suggestions are designed to help donors select items for a family that will be used in creating a personalized home environment based on their specific needs.

Community Efforts Yield Stronger Families. The purpose of Focus on Home is to help families integrate into a healthy family lifestyle. Working closely with partnering agencies, Focus on Home identifies families in need and on their personal path to improvement. Families in the program are currently living in sub-standard environments or transitioning out of homelessness. Focus on Home works with them to create a plan for a personalized home environment based on their specific needs. Focus on Home works with the community to collect donations of repurposed gently used furniture and housewares to create a family's home. The program goes far beyond filling furniture gaps, it helps families create a comfortable, dignified home where they can live, love and grow strong, allowing parents to devote their time and resources into creating positive futures for their children.
